Style Number: 310
Service: Pump Packing
Product Type : Braided Packing

Description:

Braided from continuous Meta-aramid filaments, Style 310 is impregnated with PTFE and a proprietary inert break in lubricant. Style 310 packing is also non-staining, non-glazing, and non-contaminating, with excellent heat dissipation properties. Pliable and abrasion resistant, this packing is ideally suited for mill applications, where a low leakage high durability packing is needed, such as agitators, mixers, and stock pumps.

Construction:	Interlock Braid
Temperature Rating:	500° F / 260°C
pH Rating:	1 – 12
Shaft Speed Rating:	2000 FPM / 10 MPS
Pressure Rating:	300 PSI / 20 BAR
