Style Number: 345
Service: Pump Packing
Product Type : Braided Packing

Description:

Braided from our proprietary blend of high quality flax and ramie yarns, Style 345 is thoroughly impregnated with PTFE and our proprietary inert lubricant. Our unique braiding technique and deep PTFE impregnation makes our Style 345 easy to cut and install, with excellent braid retention and conformability. Style 345 is also long lasting, corrosion resistant, and ideally suited for use in most saltwater/freshwater applications.

Construction:	Plait Braid
Temperature Rating:	250° F / 121°C
pH Rating:	5 – 9
Shaft Speed Rating:	1200 FPM / 6 MPS
Pressure Rating:	200 PSI / 14 BAR
