**Style Number:** 8010  
**Service:** Pump Packing  
**Product Type :** Braided Packing

**Description:**

Twisted and formed from anti-friction lead alloy over a soft fiberglass core, Style 8010 is impregnated with our proprietary low friction lubricant for low shaft wear and increased heat dissipation. Style 8010 packing is soft but dense, making it an excellent choice for end rings or anti-extrusion rings. This packing is ideally suited for most high pressure applications including boiler feed, reciprocating, or rotating pump service.
